Acutis Cloud Enclave (ACE)

Protect the credibility, integrity, and reputation

Buyers Guide

On-Boarding Process Steps

Commercial businesses can gain a competitive edge by adopting **Step Ahead's Acutis Cloud Enclave (ACE) and CMMC 2.0 compliance**. Government procurement often demands robust cybersecurity measures, and companies aligning with CMMC standards demonstrate a proactive commitment to cybersecurity. This not only ensures compliance with regulations but also enhances confidence among government clients, increasing the chances of winning contracts.

Buyers Guide

On-Boarding Process Steps

The above illustrate the decision-making process for businesses operating in both the Public Sector and Commercial Sector.

Considerations may include:

Data Handling:

- Do you manage Personally Identifiable Information (PII), Protected Health Information (PHI), Federal Contract Information (FCI), or Controlled Unclassified Information (CUI)?

Defense Supply Chain:

- Is your company part of the Defense Supply Chain within the Defense Industrial Base?

Compliance Requirements:

- Are you obligated to comply with standards such as GDPR, HIPAA, SOC2, ITAR, CMMC, or others?

Business Interactions:

- Do you engage with Managed Service Providers (MSPs), vendors, customers, contractors, or consultants?

Remote Workforce:

- Does your organization have a remote workforce?

Cyber Insurance:

- Do you currently possess cyber insurance or are you planning to acquire it?
- If you have cyber insurance, are you seeking ways to reduce the premium cost?

If your answer is **YES** to any of the above

Then operating your business from a secure digital facility - **Acutis Cloud Enclave(ACE)** might offset many of the critical requirements to be compliant and safe. When you use ACE, then you are doing your due diligence in protecting your information security as per the highest standards.
