

AI Powered

Acutis Cloud Enclave (ACE)

Protect the credibility, integrity, and reputation of small and medium businesses.

As Step Ahead evolves towards MSP Services, automation, and AI, we remain committed to providing simple, complete, and competitively priced solutions to meet your business needs effectively.

For this we developed **Acutis Cloud Enclave (ACE) with CMMC 2.0** at the very heart of its foundations.

USE CASE

35 years of enterprise IT implementations experience, CMMC certifications, across industry vertical exposures

AI Powered

Acutis Cloud Enclave (ACE)

Protect the credibility, integrity, and reputation of small and medium businesses.

Irrespective of business size—micro, small, medium, or large—ACE's use case is universally applicable. To determine its relevance, consider these key questions:

Data Handling:

Do you handle PII, PHI, FCI, or CUI data?

Defense Supply Chain:

Is your firm part of the Defense Supply Chain within the Defense Industrial Base?

Compliance Requirements:

Do you need to comply with GDPR, HIPAA, SOC2, ITAR, CMMC, or other standards?

Business Interactions:

Do you interact with MSPs, vendors, customers, contractors, or consultants?

Remote Workforce:

Do you have a remote workforce?

If your answer is YES to any of the above, ACE deserves consideration.

Advantages:

Third-party-assessed Enclave certification.

Adherence to major regulatory standards.

Substantial reduction in cyber insurance expenditures.

Value Propositions

Competitive pricing.

On-demand accessibility without long-term commitments.

Enclave flexibility for parking and reuse as needed.

AI Powered

Acutis Cloud Enclave (ACE)

Protect the credibility, integrity, and reputation of small and medium businesses.

Key Features of ACE: Securing Your Business Landscape

Secure Digital Perimeter:

ACE acts as a secure digital perimeter, ensuring a safe environment for business operations.

Enclave with Advanced Firewall:

The system operates as an enclave featuring a secure network safeguarded by an AI-driven next-generation firewall.

Endpoint Security:

ACE secures servers, workstations, and mobile devices through its endpoints.

Zero Trust Architecture:

Utilizes a zero-trust architecture for comprehensive security within the enclave.

User Access Management:

Unique user access is managed through Identity access and single sign-on protocols.

Hardened Productivity Suite:

ACE includes a robust productivity suite, providing a secure platform for real-time collaboration.

Business Continuity Solution:

Tailored Business Continuity Solution specifically designed for your productivity suite.

Key Benefits:

Flexibility and User-Friendliness:

ACE arrives preconfigured with CMMC 2.0, simplifying third-party assessments and optimizing time and costs through AI-driven efficiency.

Cyber Insurance Savings:

ACE, in collaboration with vendors and insurers, ensures a marked reduction in cyber insurance costs, providing optimal choices for clients.

Safeguarding Credibility and Integrity:

Beyond compliance and insurance, ACE shields the credibility, integrity, and reputation of businesses, conferring a distinctive competitive edge.

In Summary:

ACE stands as a versatile solution, catering to businesses of all sizes, delivering efficiency, compliance, and robust cybersecurity to fortify your digital landscape.
